

Jack Goble, P.E.
Arkansas River Basin

Jack is a professionally-licensed water resource engineer with the Lower Arkansas Valley Water Conservancy District. In this position, he manages several water related projects and studies within the Arkansas River Basin, including the Catlin Canal Fallowing-Leasing Pilot Project and two Irrigation Improvement Plans that include over 230 center pivot sprinklers.

Prior to joining the District, he worked as a civil design engineer in Denver, CO and Tulsa, OK, specializing in open channel hydraulics. He received his B.S. in Civil Engineering from Colorado State University in 2005.

Jack grew up on a cattle ranch in southeast Colorado that his family homesteaded in 1910 and appreciates, along with his wife, being able to raise their two sixth-generation sons on this same land.
